Dear Parent/Guardian,

Your student-athlete has sustained a possible concussion. This packet contains the paperwork necessary for your student-athlete to return to academics as well as return to play. A Head Injury Information sheet is attached; please reference the signs and symptoms described to monitor your student-athletes condition. Your student-athlete will be removed from activity/athletic participation until symptom free and cleared to start on the Return to Play FHSAA AT18 form. Please see the step by step process below. If you have any questions or concerns, please contact the appropriate athletic trainer or your school's athletic director.

Step 1: Initial Evaluation by a Physician

- o If a concussion or other head injury is not diagnosed, please get that in writing and return to coach/athletic director/athletic trainer and disregard the steps below.
- o If diagnosed with a concussion or other head injury, please follow the next steps 2-4.
 - If symptom free during initial physician evaluation, please skip to step 4.

Step 2: Return to Learn Form

 If the student-athlete needs accommodations in the classroom throughout the healing process, please have the treating physician complete and return it to the clinic assistant/school nurse.

Step 3: Return to School

- When the student-athlete returns to school, they need to report to the clinic. The clinic assistant/school nurse will notify the teachers of the injury and possible signs and symptoms to look for as well as remove them from PE/ROTC classes where physical activity is required.
- The athlete can report to the clinic throughout the day if needed due to the increase of symptoms.

Step 4: Return to Play

 When the athlete has returned to normal classroom activity and symptom free, return to the treating physician for clearance to begin the Return to Play FHSAA AT18 form.

Head Injury Information

What is a concussion?

A concussion is a brain injury caused by a blow to the head or body that causes the brain to move rapidly inside the skull. Concussions can also result from a fall or from collisions between with one or more individuals or obstacles. They disrupt normal brain function, and can range from mild to severe. A concussion is possible from a minor bump and can occur even without loss of consciousness. As brain injury, concussions are serious.

What are the signs and symptoms?

Signs (observed by others)

- a. Athlete appears dazed or stunned
- b. Confusion (about assignment, plays, etc.)
- c. Forgets plays
- d. Unsure about game, score, opponent
- e. Moves clumsily (altered coordination)
- f. Balance problems
- g. Personality change
- h. Responds slowly to questions
- i. Forgets events prior to hit
- j. Forgets events after the hit

k. Loss of consciousness (any duration)

Symptoms (reported by athlete):

- a. Headache
- b. Fatigue
- c. Nausea or vomiting
- d. Double vision, blurry vision
- e. Sensitive to light or noise
- f. Feels sluggish
- g. Feels "foggy"
- h. Problems concentrating
- i. Problems remembering

The signs, symptoms, and behaviors of a concussion are not always apparent immediately after a bump, blow, or jolt to the head or body and may develop over a few hours. An athlete should be observed following a suspected concussion and should never be left alone.

What to do?

If your child experiences any of the following, call your Doctor or go to the Emergency room immediately!

- Increased drowsiness, mental confusion or difficult to arouse
- Vomiting, nausea, fever or neck stiffness
- Weakness of face, arms or legs, difficulty balancing
- Blurred or double vision
- Slurred Speech

- Increased severity of a headache
- Seizures
- Drainage of blood or clear fluid from nose or ears
- Any other new or worsening symptoms that concerns you

If your child has any visible bumps or swelling you should apply an ice bag intermittently for the next 24 hours.

Returning to School Procedures:

- 1. If your child is still having symptoms of concussion they may need extra help to perform school-related activities. If so, please have the treating physician complete a Return to Learn form.
- 2. As your child's symptoms decrease during recovery, the extra help or supports can be removed gradually.

(Returning to School Procedures cont'd.)

- 3. Notify the school nurse or clinic aid and athletic director upon return to school. If completed, turn in the Return to Learn form to the school nurse at this time.
- 4. School personnel will be instructed to watch for:
 - Increased problems paying attention or concentrating
 - Increased problems remembering or learning new information
 - Longer time needed to complete tasks or assignments
 - Greater irritability, less able to cope with stress
 - Symptoms worsen (e.g., headache, tiredness) when doing schoolwork
- 5. Communicate with your teachers, school nurse, clinic aid, athletic director and/or guidance counselor regarding your status throughout the school day.
- 6. Follow up with your Athletic Trainer for an ImPact post-test if available.

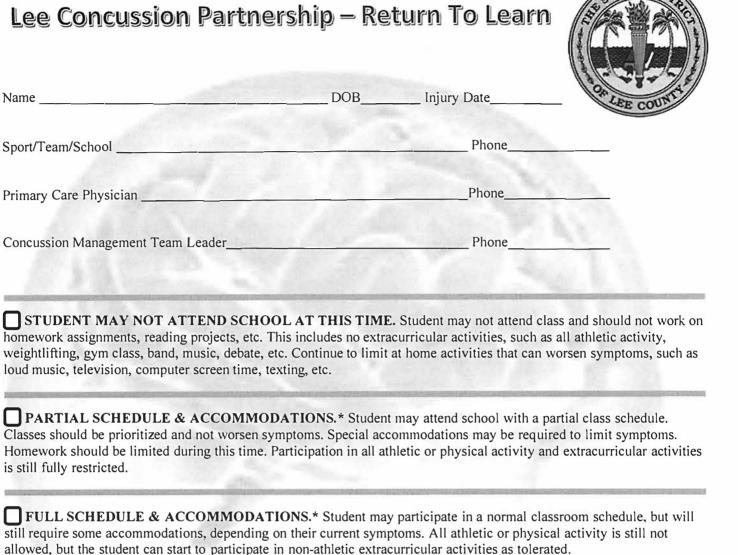

Returning to Play Procedures:

The FHSAA Return to Play (RTP) Criteria: Concussion Management

- 1. No athlete should return to play (RTP) or practice on the same day of a concussion. "When in doubt, sit them out!"
- 2. Any athlete suspected of having a concussion must be evaluated by an AHCP (Appropriate Health-Care Professional: MD, DO or PA) as soon as possible and practical.
- 3. Any athlete who has sustained a concussion must be medically cleared by an AHCP prior to resuming participation in any practice or competition.
- 4. After the athlete is symptom free and ImPact test as returned to normal (if available), the athlete may seek evaluation and examination by an AHCP to receive clearance to begin RTP on the Form AT18 (Post Head Injury/Concussion) Page 1.
- 5. Return to play must follow a step-wise protocol as defined by the "Graded Return to Play Protocol" form and under the supervision of an AHCP, Athletic Trainer, coach, or other health care professional. Form AT18 (Post Head Injury/Concussion) Page 1.
- 6. A written medical clearance from an AHCP is required for return to competition. Form AT18 Page 2.

Lee Concussion Partnership - Return To Learn

Gradually increase school participation and independence as tolerated by the student. Goal is to achieve full return to school without accommodations.

NORMAL CLASSROOM. Student is cleared for Normal Classroom Activities and "Post Head Injury/Concussion" Initial Return to Participation" (AT18 Form – Page 1 must be signed by Physician)

Medical Professional Signature: ______ Date____

Scheduled Follow-up Date

Primary Care Physician _____

is still fully restricted.

Concussion symptoms may develop within days after a head injury. The patient should continue to be observed for any new symptoms.

*School management team will meet to determine appropriate accommodations on an individual basis.

Florida High School Athletic Association

Revised 06/15

Post Head Injury/Concussion Initial Return to Participation (Page 1 of 2)

This form is to be completed by an appropriate health care provider (AHCP) trained in the latest concussion evaluation and management protocols as defined in FHSAA policy 40.2 for any student-athlete that has sustained a concussion and must be kept on file at the student-athlete's school. The choice of AHCP remains the decision of the parent/guardian or responsible party of the student-athlete.
